CULTO

CULTO

A modular furniture system made of lightweight concrete that works like a kit. Disassemble, rebuild and adapt as your life changes.

Furniture usually has one life. You buy it, you throw it away in a few years. **CULTO is** a modular system made from lightweight concrete – 70% recycled and up to 60% lighter than conventional concrete. It works like a kit: you disassemble it, rebuild it and use it again. Depending on how your life changes.

A proprietary concrete mix, tool-free dry joint system and digital configurator combine circular design, smart manufacturing and customer experience into one. No disposable furniture. No unaffordable custom fabrication. Furniture that doesn't just adapt once – but for its entire lifetime. Made in the Czech Republic.
